PROFILE

Passionate and results-driven web developer with 1.5 years of experience in building robust and scalable applications using Django, Flask, and Django REST Framework. Skilled in crafting efficient APIs and developing dynamic web solutions. On the frontend, I work with React as well to create smooth user experiences. Always dedicated to continuous learning and improving skill to deliver my best in every project I undertake!

EXPERIENCE

AliTech 2022 - 2022

--> As a Django/DRF Developer

Freelancing Present

PROJECTS EXPERIENCE

EduAssist

LMS Platform

2021 - 2022

- During covid developed a web app where students could watch recorded live zoom lecture, download their assignments, get help with their assignments, quiz section, and a lot
- Backend in: Django, also used Celery for async functions
- Changed this project niche a lot with time

Plantaria

University FYP

2024 - 2025

- An AI based android app that recognizes the disease in leaf image and suggests its treatment and precautions, has three user roles Farmer, Consultant and Vendor, Vendor would sell their agri-products while Farmer could chat with Consultant for advisory
- Its techstack was Backend in Django Restframework and Frontend was in React Native, I worked on its backend
- We got third position for this project in our University

Others

Apart from above mentioned

- developed www.satyawellness.fit for an Upwork client
- developing Masalele, a platform to sell spices
- these are some of the projects I have worked on!
